

Duane Wardell

Duane Wardell - Longtime Houston Database Administration Professional

Duane Wardell is a veteran IT analyst with extensive experience in database administration (DBA) spanning Oracle and INGRES. As consultant and database programmer/analyst with the Memorial Hermann Healthcare System, he provided support and management services related to all phases of software development. Duane Wardell worked with mission critical DBA architecture and third-party software integration applications within a 24/7 project environment.

Mr. Wardell also has past experience with esoftsolutions, Inc., in Houston as database administration practice leader for e-services. He guided database administration services at the operational level and provided clients with dedicated consulting solutions. From 1988 to 1996, Mr. Wardell engaged with Electronic Data Systems in Houston in a number of capacities, including as technical team leader of the DBA group, Enron account. He guided projects essential in the installation and setup of Oracle Financials and undertook physical database design and implementation assignments. Duane Wardell holds a bachelor's degree in computer science from Wayne State University.
