Email: bharani91@gmail.com

- *I am a UI Designer and full-stack developer with a passion for building high quality software products.*
- *I have successfully **bootstrapped my first venture - Resumonk**. Resumonk is an online resume (CV) builder that is currently being used by thousands of people across the globe.*
- *In my previous roles, I have worked with a wide array of startups on different platforms ranging from hybrid mobile applications to rich client web applications.*
- *Specialities: Designing and prototyping user interfaces, building MVP (Minimum Viable Products), developing web applications using modern tools and practices & exploring the latest trends in web/mobile development.*

EXPERIENCE

Resumonk
April 2012 to Present

Co-Founder

- Resumonk is an online resume builder that helps people create a beautiful and professional resume (CV) in minutes.
- Resumonk is bootstrapped and profitable. It has been featured in many technology magazines and newspapers.
- I designed and developed the application using modern coding practices and I currently help manage growth & user acquisition.

Freelance UI Designer & Developer
February 2012 to May 2013

Self Employed

As a freelance UI Designer & Developer, I have worked with a wide array of startups and small-businesses. Some of the projects that I have worked on are as follows -

- **Phone Warrior** - I designed the logo, website and mobile interface (Android, iOS & Blackberry) for Phone Warrior, a popular Call/SMS blocking app with over a million downloads.
- **LearnHive** - Learnhive is a leading provider of technology based learning solutions for K12 students, parents, and tutors. I wireframed, designed and developed LearnHive's web interface. The design is **responsive** and was built in a **mobile-first** manner.
- **SnapLion** - SnapLion is a mobile application builder that is used by some of the best hotels, nightclubs and artists in the world. I developed the user-facing dashboard and prototyped the first version of their **HTML5 mobile application using AngularJS**.
- **JetStay** (not launched yet) - JetStay is an online ticketing application. I was responsible for prototyping, designing and developing the front-end aspect of the application. I built the design in a **responsive & mobile-first** manner.

FizzySoftware Pvt. Ltd
August 2011 to January 2012

Visual Designer / Front-end Developer

As a Part-time Designer & Front-end developer at Fizzy Software, I designed and developed the user-facing aspects of the following products -

- **TheDealKart** - A daily deals aggregator
- **TDK Enterprise** - A Loyalty and Daily Deals Management Software for small businesses
- **TextAdda** (retired) - A cross-platform messaging application

PROJECTS

Bootstrap Carnival
June 2014 to Present

http://bootstrapcarnival.com

- Bootstrap Carnival is a Bootstrap theme finder that helps users find the perfect theme for their next project.
- It has been featured on the front page of popular technology news websites like HackerNews and is currently being used by thousands of people every month.
- I built Bootstrap Carnival using **Ruby on Rails, HTML5, SASS (Compass) & Javascript (History.js)** and it is hosted using Amazon EC2.

India GK Quiz

January 2014 to Present

https://play.google.com/store/apps/details?id=com.abhayam.indiagkquiz

- India GK Quiz is an Android application that helps job-seekers and students preparing for competitive examinations.
- With over 60,000 downloads and 1500+ ratings, it is one of the most downloaded app in its category.
- I designed and developed the application using **AngularJS & PhoneGap**.

Engem.me

October 2012 to Present

https://engem.me

- Engem is a web application that helps you give your Linkedin profile a visual facelift. It consumes APIs from various online services like Facebook, Twitter, Instagram, Dribbble and LinkedIn to create a visually appealing online profile & portfolio.
- It was built using **Ruby on Rails, HTML5, SASS (Compass) & Javascript (jQuery).**

Airball

October 2012 to Present

http://airball.in

- AirBall is an elegant and classy Dribbble feed viewer built using Dribbble's API. Airball is available as a web and a desktop application.
- The web application was built using **Backbone.js** and the Desktop application was developed using **Tide SDK (Titanium Desktop).**
