

Andrew Anagnost

California Mechanical and Computer Science Engineer Andrew Anagnost

An experienced engineer and business professional, Andrew Anagnost is a summa cum laude graduate of California State University, Northridge (CSUN), where he served as campus president of the American Society of Mechanical Engineers and the American Institute of Aeronautics and Astronautics. After graduating from CSUN with a BS in mechanical engineering, Andrew Anagnost attended Stanford University, where he earned an MS in aeronautic and astronautic sciences and a PhD in engineering and computer science.

He has since found success in the fields of marketing, sales, product development, and general management. Over the course of his career, Dr. Anagnost has headed a number of product organizations with an emphasis in customer service and cloud software applications.

Since 2012, Andrew Anagnost has served as the senior vice president of industry strategy and marketing for the 3D design software company Autodesk. In this position he is in charge of all Autodesk marketing direction and resource allocation initiatives.
