DevOps & Database Management: Containerization (Docker), Continuous Integration/Continuous Deployment (CI/CD), Database Management

Languages: English, Spanish, Portuguese

EXPERIENCE

Energy2go- Brazil

JAN 2024-FEB 2025

Software developer

Currently working as an SDE at Energy2go. We provide charging stations for your mobile in concerts, malls and other sites where you are likely to book an Uber with 2% battery. Gained in-depth understanding of microservice architecture, enhancing system scalability and maintainability

- Implemented CI/CD pipelines and containerized applications with Docker to ensure consistent, high-quality deployments across environments
- Created and maintained comprehensive build and release documentation and contributed to code reviews to enforce software quality standards and best practices
- Utilized Vue.js for front-end development, Node.js for backend ensuring dynamic and responsive user interfaces, jest for testing
- Developed APIs using Python, leveraging Django framework for efficient database management

Freelance- Brazil

APRIL 2022-JAN 2024

Contributed to building a Django-based application that streamlined human resources and inventory management for a logistics client. Implemented real-time notifications using Django Channels API, Django ORM Signals, and HTML5 WebSockets to keep users informed of critical activities within the application.

- Leveraging Django for robust backend development, Flutter for dynamic frontend interfaces, and Heroku for efficient server hosting
- Additionally, successfully completed small-scale projects involving Google Apps Script development and Python web scraping techniques for diverse clients
- Migrated legacy APIs to serverless AWS infrastructure, reducing operational overhead.

Accenture India Private Ltd.- India

NOV 2017 - JAN 2022

Procurement Operations Analyst

Varied Industry Exposure: Around 4 yrs of experience with Accenture Operations, with varied industry experience which includes logistics-fleet management, oil and gas, aerospace, and consumer goods

- ERP applications: Functioned as a subject matter expert, for ERP applications like SAP ERP, Coupa, Ariba, salesforce etc, handling a small team and direct point of contact for clients. Have also been responsible for increased client delight for the team and part of various knowledge transfer processes
- Stakeholder Management: Expertly managed client relationships and collaborated with multiple stakeholders, showcasing strong interpersonal skills
- Led strategic cost reduction initiatives, demonstrating analytical and resourceful thinking, leadership and problem solving
- Lead Inclusion and Diversity activities for 350 people team over a duration of 2 years
- 9 times consecutive winner for high performer reward

PROJECTS

PRESENT

- Where Is My Buddy – Open-source tool helping users find ideal study partners
React, Node.js, Next UI, MongoDB | -[Github](#), [Blog](#)
- Dahlia – On-Demand Parking – Geo-based parking solution (Next.js, TypeScript) -[Github](#)
