

Ilyas Munshi

Dr. Ilyas Munshi Treats a Variety of Spine and Neurological Disorders

Board-certified neurosurgeon Ilyas Munshi, MD, APMC, operates a private neurosurgery office in Lafayette, Louisiana. In practice since 2001, he provides treatment for a broad array of spine, brain, and nerve conditions, including back injuries, spinal stenosis, adult and pediatric brain tumors, and epilepsy. Along with the application of non-surgical methods such as epidural spinal injections and spinal cord stimulation, Dr. Ilyas Munshi performs surgical procedures such as minimally invasive lumbar and cervical discectomy, scoliosis surgery, craniotomy, and spinal fusion.

Complementing his private practice, Dr. Munshi holds privileges at Our Lady of Lourdes Regional Medical Center, Lafayette Surgical Hospital, and Lafayette General Medical Center. He maintains membership in such medical organizations as the North American Spine Society, the American Association of Neurological Surgeons, and the Lafayette Parish Medical Society. Committed to remaining informed of the latest practices in his field, Ilyas Munshi actively attends professional conferences and has taken numerous continuing education courses on techniques as varied as robotic radiosurgery and lumbar discography.

Dr. Munshi received an MD from Rush Medical College and held a residency in neurosurgery at the University of Chicago. In service to the local community, he volunteers to deliver free neurosurgical treatment for those with limited resources. He also contributes to events organized within the local Indian-American community.
